#### DEMONS' WORK.

Deliberate Attempt to Burn Seven Men Alive.

East St. Louis the Place of the Crime-Frightful Scene to the Night.

East St. Louis, Feb. 5 .- A terrible at tempt upon human life was perpetrated last night. Shortly after 10 o'clock fire in a shanty near the railroad tracks was dis-covered. The glare of light attracted the attention of all the railroad men who hap-pened to be out. They ran toward the attention of all the railroad men who happened to be out. They ran toward the place, and, as they did so, they heard shrieks, groans and cries, telling that human beings were held there in the fiery cage, unable to escape. There was a rush to the door, and it was forced in, when two men staggered out. Other men were dragged out unconscious. The faces of the victims were blackened, and long strips of flesh pealed off, presenting a horrid sight. There were seven men taken out of the building. They said they had scrolled into the shanty in order to warm up, and were sitting around the stove talking, when suddenly the stove seemed to burst open and the flames went all about the room, enveloping the men before they could turn toward the door. They, could only beat about with their hands and struggle with each other in the endeavor to get to the exit. They grappled with each other and thus impeded their escape, and it seemed an eternity before they heard the cries of those who came to the rescue. They remembered very distinctly that they smelled coal oil as the flames burst around them. The strange manner in which the fire started can only be accounted for on the ground that some wretch poured oil down the chimney to the stove. Near the back of the shanty, on the ground, was found a tin can, which had evidently contained coal oil. The manes of the unfortunate men are Morris McGlynn, James Donohue, Wm. Gilkie, Pat Boyle, Scott Sanderson, Joseph McGlee, Fred Brickson. They are all fearfully burned, but whether or not any of them are necessarily fatally injured can not be known as yet.

I sit at an operating table all day and know all the regulars on my circuit by their voices. Often in walking along the street i recognize the voice of a person whom I never saw before and know that he belongs to telephone No. —; and as I know the names of the most of my patrons I thus become familiar with the faces of many men to whom I was never introduced. As an illustration of how I have learned to remember voices I will tell an incident that occurred last week. I was up in Chicago and happened to use the telephone. As soon as an answer came I recognized the voice as that of an operator named Brown, with whom I had worked in Cincinnair three years before. I did not know he was in Chicago, and was glad to see or rather to hear him. He was much surprised at my calling him by name, and told me that he was in a district station fully three miles from where I was standing. Yes, it is rather hard to disting the the voices at first, but with a little attention to the business an operator quickly acquires a very scute ear.

Some curious researches have recently been undertaken by Swiss and Swedish physicians on the color of the eyes, but without any apparent practical purpose For convenience all eyes were divided into For convenience alleyes were divided into blue or brown, the various shades of gray eyes being classified according to the prominence of blue or brown in their color. Some of the conclusions drawn from a great many observations are these: That women with brown eyes have better prospect of marriage than those with blue; that the average number of children is greater with parents whose eyes are dissimilar. In children both of whose parents have blue eyes ninety-three per cent, inherit blue eyes; but in children both of whose parents have brown eyes. The above results were reached in Switzerland. In Swedon the discoveries were not quite the same. The women with brown eyes are more numerous there than the men with brown eyes, but brown eyes are apparently increasing there, as in Switzerland.
